

Writing Intent

At Draycott Community Primary School, our writing curriculum aims to foster a love for writing and equip our students with the skills necessary to communicate effectively across various contexts. We believe that writing is a powerful tool for self-expression, creativity, and academic success.

Our intent is to:

1. **Develop Writing Skills:** Children will learn to write with clarity, structure, and purpose. They will be taught how to plan, draft, revise, and edit their work, enabling them to become confident and competent writers.
2. **Encourage Creativity and Imagination:** We aim to inspire creativity through various writing tasks, allowing students to explore different genres, express their ideas, and develop their unique voices.
3. **Promote the Joy of Writing:** We believe that writing should be an enjoyable and rewarding experience. Through a variety of activities and regular practice, we will help students see the value of writing as both a means of communication and a form of art.
4. **Support Different Writing Styles:** Children will have opportunities to explore different types of writing, such as narrative, descriptive, persuasive, and informative, building a broad skill set for various writing tasks.
5. **Foster Confidence in Communication:** By encouraging self-expression through writing, we will help children gain confidence in their ability to communicate effectively and engage with their audience.
6. **Integrate Cross-Curricular Links:** Writing will not be confined to literacy lessons alone. We will integrate writing opportunities across all subjects, allowing children to apply their writing skills in diverse contexts.

Ultimately, our goal is to help students become thoughtful, independent writers who can express their ideas clearly and with confidence, both in and outside the classroom.
